

Turf Pallet & Big Roll HAULER

QuadLift™

The weakest link in your turf harvesting system could be the fast and efficient transport of turf from the field to your waiting truck. With a four pallet capacity, 180 degree pivoting operator's seat for driving either direction and a 20 mph transport speed, the Trebro QuadLift is exactly what you need to keep up with the increased production of our one-man harvesting machines. This machine allows you to quickly move big rolls or pallets of turf, which further increases the overall efficiency of your harvesting operation.

...the ultimate pallet and big roll moving machine.

FEATURES

- Bi-directional operation with a top speed of 20 mph
- Operator's platform rotates 180 degrees
- Hold-downs keep pallets stable during transport
- Carries a total of four pallets or big rolls using our unique swinging fork system
- Convenient fingertip controls
- Cummins 160 hp, Tier IV interim engine
- Infinitely variable hydrostatic transmission

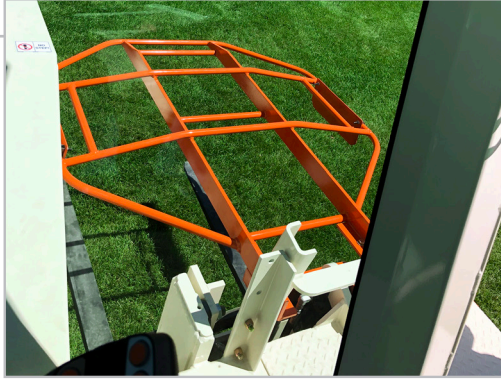

Easy view of pallet forks out all sides
